I have just one problem with the demo.. I MUST have the shader level at max for it to work otherwise I'm just getting black and transparent textures..it is the same on the Beta..

Well some1 tried to run demo on some notebook ? Especially with a rad HD 2600 (512mb) or gf 8600 (256) ?

I'd be glad if I know how it runs on 1280x800 on these graphics :D

Starting download demo. I'll try it on monday (no comp here, in da hause) on 9800Pro :D (~ minimal details).

P.S.

Forum design was better before. This is quite unreadable ;(
